

Our green convention for eco-friendliness and environmental respect.

Welcome to « les trois cascades. »

We thank you for choosing our guest house for your stay in Raiatea.

Here are our commitments for protecting the environment:

- The hot water of the guest house is produced entirely by solar water heaters.
- Electric energy is produced by photovoltaic panels installed on the main roof of the guest house.
- *We are using only biodegradable detergent for washing our bed sheets and towels.*
- *Should you wish that we replace your towel, please hand it to the housekeeper or to us at front desk, we will exchange it with a clean one.*
- *We are progressively replacing our individual toiletries with eco-friendly, refillable shower gel and shampoo dispensers, using the same quality products made locally in Tahiti by Tiki perfumery.*
- *We are in the process of replacing all our plastic trash bags with compostable and biodegradable trash bags.*

We thank you for your attention and participation.

The whole team at Trois Cascades guest house
